## IT'S INCLUDED IN YOUR ACCOUNT!

Subscribers on CQ Network can use their account in two ways. First, as a contractor meeting client requirements. Also, to prequalify and manage your own contractors. No additional costs involved! This includes CQN implementation and contractor onboarding. We work with you to ensure your account is set-up to manage contractors based on your specific criteria.

## GET STARTED WITH ONE CLICK

Simply click the 'I want to manage contractors' toggle to Yes in the Account Status box. Your Home page will now show a new section - My Contractors. There may be connections already visible. You can view their documents, data, and questionnaire responses just like your data is available to your clients. We are here to guide you through the process - set up is straightforward. Contact us to learn more.

## CONFIGURE TO YOUR PROCESS

You have control over questionnaire, document and approval criteria. Use the CQN defaults or we can configure the platform to your requirements. The application allows complete flexibility for any range of contractor management activity, size of contractor, risk level or industry.

## BENEFIT FROM THE CQN EVALUATION

Our contractor evaluations and approval services help to reduce risk and increase peace of mind! CQN's evaluation of health, safety and environmental systems ensures your contractors have achieved legislative and industry standard requirements. It provides an effective first pass of contractor assessment for client organizations.
